

- 1** Your Altegra Gazebo whether steel or aluminium are packaged in 2 cartons, one for the canopy and one for the frame. Using a pair of scissors or cutting knife carefully remove the outer cartons

- 2** Lay the frame on the ground and unzip the lower section. Roll the frame as you do so and carefully fold back the bottom section of the carry bag so that it is totally clear of the feet.

- 3** Open the canopy flap and remove the canopy from the side pocket.  
*Note: The first assembly will not require this step as the canopy will be package separately*

- 4** Whilst in this position it is advised to also remove the pegs and guy ropes from the zipped side pocket.

- 5** Slide the carry bag gently upwards removing it totally from the frame work.

- 6** You are now ready to set up your Altegra Gazebo
